

Graduate Student Position in Biological Oceanography

University of Victoria

A graduate student position is available to work on ecological physiology of Arctic and sub-Arctic phytoplankton. Trainees will have a variety of projects to choose from related to primary productivity and nutrient physiology of marine phytoplankton in field and laboratory settings. Research may require participation in research cruises to the Gulf of Alaska and/or the Canadian Arctic.

The student will be working under the supervision of Dr. Diana E. Varela in the Department of Biology and the School of Earth and Ocean Sciences at the University of Victoria, Victoria, Canada.

Preference will be give to a student with an excellent academic standing (GPA > 7/9 or 3.3/4) interested in pursuing a Ph.D. degree.

Submit C.V. indicating previous research experience, unofficial copies of your university transcripts (undergraduate and graduate as appropriate) and a brief statement of scientific interests to: Dr. Diana Varela at dvarela@uvic.ca.

To be eligible for UVic entrance fellowships applications must be received at Graduate Studies by February 15. Interested individuals are encouraged to contact Dr. Varela as soon as possible.
